

System Improvement Application – Please complete this so we can change service at an existing location.

Name: _____

Business Name (if applicable): _____

Local Contact Phone: _____ Email Address: _____

Meter # of location to have system improvement: _____

Physical Address of Property: _____

If Aid to Construction is necessary, it will be paid by (name and address or email): _____

Name of Electrical Contractor: _____

MWEC Representative you are working with on this service: _____

If you are requesting a change of service, it's for:

____ Line Move ____ Yard Light ____ Down Size of Service ____ Double Throw Switch

____ Retirement of Service (Meter # to be retired: _____)

If you are requesting an increase in service size, you want the size of the new service entrance to be:

____ 200 amp ____ 400 amp ____ Other: Size _____

Service Voltage Required: Please check which type of service and voltage applies or fill in the additional information. Our standard three-phase voltages is: Grounded Wye 277/480

Type of Service Required: Single Phase _____ Three Phase _____

120/208: _____ 120/240: _____ 277/480: _____ Other (Specify): _____

The member will be required to provide a disconnect switch accessible to MWEC, upon which MWEC will

terminate the conductors from the transformer and the wires to the metering point. This termination and metering point will be acknowledged by both parties as the point where ownership changes.

The Member will be required to provide protection for "single-phase" conditions. MWEC cannot guarantee that one or two phases of a three-phase service will not lose power from the source. The Member must provide appropriate protection for the member's own equipment for this condition.

While MWEC has and will be making applications to its power supplier for delivery of the requested power to this site, the Member has been informed and understands that because of limitation inherent to the power grid there is no guarantee or certainty that such power will be available or, if available, the date when that delivery will be made available. I understand that MWEC cannot and does not guarantee uninterrupted service of power. MWEC is not to be held liable for any losses or damages, whether actual, consequential, punitive, or otherwise, to the Member or anyone claiming by, thru, or under the Member related to the failure to deliver this power, as requested, if it is not available or cannot be delivered in a timely manner. _____ Applicant's Initials

Members are billed actual cost for their project construction. MWEC requires members to pay a deposit for their project before construction is scheduled. This deposit is separate from, and in addition to, any meter deposit that may be required. A final cost for the project will be based on material, labor, overhead, special services, and special equipment figures after construction has been completed. Applicant understands that he/she will be billed and must pay for the actual cost of this project. _____ Applicant's Initials

This service is in full compliance with any applicable laws, ordinances, building codes, and zoning regulations. _____ Applicant's Initials

Weather may impact the cost of construction. Are you interested in delaying construction due to weather conditions? ____ Yes ____ No

The applicant acknowledges that he/she has read the above information, and the applicant certifies that all information on this application is complete and accurate.
